

YOUR PATH TO A WARM HOME, COOL PLANET, HOT SAVINGS

BEFORE: Brrrrrr!
Inefficient homes are drafty and uncomfortable, and waste money and energy.

STEP 1: Assess.

Sign up! We'll help you get a free or reduced-cost home energy assessment. An Energize-approved contractor uses diagnostic testing to show where your home is wasting energy and writes a report for you.

The Energy Coach can review your report and help you decide on the most cost-effective upgrades.

STEP 2: Finance.

Your contractor will explain incentives, subsidies and financing options.

In many cases, your annual savings will meet or exceed annual loan costs.

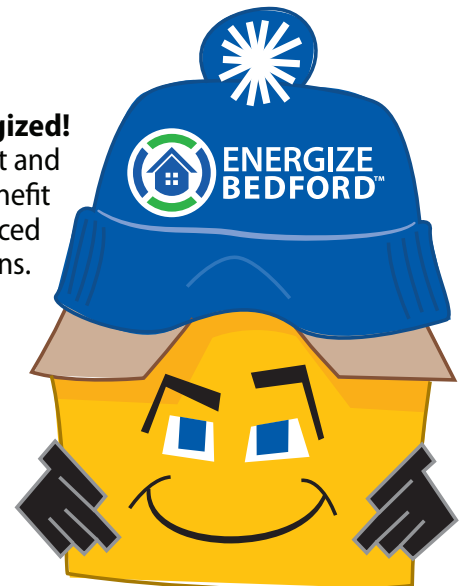

Bedford residents will receive a special 10% discount when they commit to energy upgrades with an Energize-approved contractor by January 15, 2018.

STEP 3: Upgrade. Your Energize-approved contractor completes the work to your home. Energy efficiency upgrades can involve the home's "envelope" (air sealing and insulation) and/or the mechanicals (heating and cooling systems).

AFTER: Energized!

You enjoy increased comfort and cost savings, and we all benefit from your home's reduced greenhouse gas emissions.

Take the first step to an Energized home!

Contact Energize Bedford by visiting <http://bedford.energizeny.org> or calling Lauren at (914) 302-7300 ext. 8102.
